

### Requester:

I'm a journalist with XXX. In your expert opinion, does this image show signs of AI-generation?

## Our team:

We have performed an analysis of the image using multiple detection methods -- the consensus is this image is **highly likely created using AI**...

# DeepFake-O-Meter

DeepFake-O-Meter UB Media Forensics Lab		
The likelihood score derived from the method indicates the probability of the input being fake. This score reflects the extent to which the input shares characteristics with the real or fake data labeled in the training set of the method, as reported in the original study, supported by correlation statistics. However, it is important to note that this score should not be considered as providing a definitive result.		
Detector	Result	Details
AIDE (2024)	 9.2% An Unlabeled method	<a href="#">View detail</a>
CLIP-ViT (2023)	 0.0% An Unlabeled method	<a href="#">View detail</a>
CORE (2022)	 100.0% An Unlabeled method	<a href="#">View detail</a>
DMImageDetection (2023)	 0.0% An Unlabeled method	<a href="#">View detail</a>
